

MARINE ORNITHOLOGY

Marine Ornithology is published by the Pacific Seabird Group, on behalf of the African, Australasian, Dutch, and Japanese Seabird Groups. The journal provides an international outlet for publications relating to marine birds, extending its reach and accessibility by appearing free on the World Wide Web in a form that can be downloaded and printed in the same style as the hardcopy document. The print version is available for both individual and institutional subscribers.

Remittances for all institutional and all other individual subscriptions to the print version of *Marine Ornithology* should be sent to:
Natasha Gillies
(marine.ornithology.manager@gmail.com)

See www.marineornithology.org to pay online and for current subscription rates.

Marine Ornithology publishes papers relating to the biology and conservation of birds associated with the marine environment—behaviour, biogeography, ecology, evolution, genetics, physiology, and systematics. Papers are especially invited on topics relating to the special adaptations of marine birds, the relationship between seabirds and oceanography, and seabird–fisheries interactions. Papers will be accepted on their merits as either pure science (advancement of knowledge) or conservation (advancement of seabird conservation), including issues relating to public policy and legislation. Normal academic publishing policy is followed with respect to authorship, originality, and sole publication. Everything that appears in the printed journal also appears on the website. In addition, papers using video, sound clips, or other non-print media can be submitted for publication on the web only.

Submissions may be any of the following:

Review articles: major papers reviewing an area of marine bird science or conservation that achieve a new synthesis of existing information;

Papers: reports of research results or conservation action of any length;

Status reports: comprehensive reviews of seabird population status for species and geographical regions;

Forum articles: short papers commenting on material carried by the journal, reporting new hypotheses relating to marine bird science or conservation, or reporting biological or physical processes relevant to marine birds that were hitherto little known or ignored by marine ornithologists.

General queries relating to *Marine Ornithology* should be directed to:

Natasha Gillies, Managing Editor
(marine.ornithology.manager@gmail.com)

All material for publication, except book reviews, should be submitted to:

David Ainley, Editor-in-Chief
(marine.ornithology.editor@gmail.com)

Book reviews, along with books, monographs, and proceedings for review, should be sent to:

Eric Wagner, Book Review Editor
(erlwagne@gmail.com)

Marine Ornithology is published both in hard copy and in electronic form at the *Marine Ornithology* website. For those browsing the electronic version of the journal, papers are available in Portable Document Format (.pdf) so that they can be captured as exact facsimiles of the printed version for reading or printing. There is no charge for viewing or downloading papers posted at www.marineornithology.org.
